Women Ex-Combatants and Peace Processes:
Innovations and Challenges from
Gender and Mediation in Guinea-Bissau:

This policy brief addresses the origins and development of the Group of Women Facilitators (Grupo de Mulheres Facilitatoras – GMF), focusing on the period from May to November 2017.

While the GMF does not represent a panacea to the country’s recurring instability, it offers a promising if incipient innovation in conflict prevention in Guinea-Bissau. By opening up a space for women to facilitate dialogue at the highest levels, the GMF has established new channels of communication that may not only benefit the Conakry process, but also promote greater political inclusiveness.
Innovation in Conflict Prevention (ICP) is a project aimed at identifying promising approaches, responses, and practices in the prevention in armed conflict, focusing on six country case studies in Africa.
